

AMH Series Desiccant Dehumidifier

ADVANTAGES

- Efficient absorption silica gel wheel
- Control noise damping and shock absorption
- Industrial flange for easy operation
- Circuit breaker incorporated to minimize damage at high temperatures for electrical motor; heater and the drive wheel
- Leakage protection safeguard for electrical motor; heater and the drive wheel
- Unique seal design; Reduces air leakage
- Dynamic balance design, ensures stable operation while moving
- Able to operate in a wide range of temperatures from -20°C + 50°C heat
- The design is in line with the requirements of IEC protection Class IP44

The desiccant wheel itself is made of quality silica gel material, which is very good at absorbing water vapour.

Product Data

Model	AMH-210	AMH-320	AMH-600	AMH-820	AMH-1050
